NCCEM: This interactive 2-day conference is designed to provide practicing ER physicians and others within the field of Emergency Medicine with evidence-based updates.
Dear Colleague,

We are pleased to invite you to the 2013 National Capital Conference on Emergency Medicine, February 8-9, 2013 in Ottawa.

Our 2-day conference will offer a spectrum of both core and cutting edge topics in the practice of adult and pediatric emergency medicine. Our guest faculty proudly represents the realities of emergency medicine in Canadian Academic Health Science Centres as well as community and rural settings. They are emergency medicine leaders in the field of both practice and research.

New in 2013 is our exciting 2-day (February 6-7) pre-conference hands-on Skills program offering attendees the opportunity to learn and practice their skills. See reverse side for the complete list of optional pre-conference workshops.

Ottawa is host to Winterlude, Canada’s winter celebration February 1-18, 2013. We’ve moved our conference venue to the iconic Fairmont Château Laurier, located steps away from the capital’s best restaurants, attractions and museums. A limited number of hotel guestrooms have been secured at an exceptional rate; early reservation recommended. Bring your family and enjoy a skate on the Rideau Canal along with many other fun-filled activities Winterlude has to offer.

We encourage you to register early for this dynamic, educational and interactive conference and look forward to meeting you in Ottawa!

Christine Johns, MD CCFP-EM
Emergency Physician, The Ottawa Hospital
